Game Automation Using Hand Gestures | In final year project

Project Description

The project is based on Deep Learning, which is a sub-field of machine learning, concerned with algorithms inspired by the structure and function of the brain called artificial neural networks. In the project. TensorFlow is used. which is an open-source software library created by Google for machine learning applications. It is used for detecting, identifying, and tracking objects through the camera in real-time. The project uses a pre-trained model on Microsoft Common Objects in Context (COCO) data set, which contains approximately all common objects. The purpose of this project is to implement the 'Students and vehicles counter' in the college in real-time.

Tech Stack
Deep Learning, Python libraries
